

INDEX OF SUBJECTS

Original Articles

A

- A₂ hemoglobin**, see under Hemoglobin(s)
- Absorption**, intestinal, *d*-xylose test, limitations of usefulness of, 261
- Acanthamoeba**, infections with, specific indirect immunoenzymatic staining of formalin-fixed paraffin sections, 475
- Accuracy**
calcium analysis in the United States, CAP-NBS survey, 974
clinical chemistry, CAP survey, 960
international laboratory survey, COWS/WASP/CAP collaborative study, 1007
- N-Acetyl-l-cysteine**, isolation of cryptococcus from sputum with, 916
- Acetylsalicylic acid**, see Aspirin
- Acridine orange**, see Stain(s), fluorochromation, supravital
- Acrylic plastic**, see Plastic
- Active transport**, see under Transport
- ACTH** in plasma, radioreceptor assay, simple and sensitive (letter), 285
- Acute lymphocytic leukemia**, see under Leukemia
- Adenocarcinoma(s)**, clear-cell, of cervix and vagina (abstract), 603
- Adenosine monophosphate**, cyclic, role in malignant transformation (symposium), 669
- Adenosine triphosphate assay**, luciferase, for detection of bacteria in clinical specimens, limits of applicability of, 493
- Adherence**, platelet-neutrophil, see under Platelet(s)
- Adriamycin**, 6-mercaptapurine and for refractory leukemia causing hepatotoxicity (abstract), 758
- Afterchrome mordanting**, phenocyanin TC and, in histology, 876
- Agglutination**, latex particle, discrete-particle light-scatter photometer used for assays based on (abstract), 764
- Agglutinator(s)**, serum, elevated titers an indicator of infection, 98
- Aggregation**, platelet, see under Platelet(s)
- Aggregometer**, platelet, coagulation and fibrinolytic screening test using (abstract), 587
- AHF**, see Antihemophilic factor
- Alcoholic hyalin**, see under Hyalin
- Alkaline phosphatase isoenzymes** in human serum, chemical inhibition method for, 564
- Alpha-l-antitrypsin**, see Antitrypsin, alpha-l
- Alveolar-cell carcinoma**, see under Carcinoma
- Ameba(s)**
soil
detection of infection with by immunoenzymatic staining and hematoxylin and eosin (abstract), 590
infections with, specific indirect immunoenzymatic staining of formalin-fixed paraffin sections, 475
- Amebic meningoencephalitis**, see under Meningoencephalitis
- Amino acid analysis**
hemoglobin_{GLY→ASP}, 91
hemoglobin_{HOPE}, 87
- Aminoglycoside(s)**
inoculum used for assay, effects of variations on activities found, 438
in-vitro assays of, effects on procedural variations, 438
medium used for assay, effects of variations on activities found, 438
- Ammonium hydroxide** in improved culture method for isolation of *Histoplasma capsulatum* and *Blastomyces dermatitidis* from contaminated specimens, 276
- AMP**, see Adenosine monophosphate
- Anaerobe(s)**, *Salmonella typhi* isolate, 117
- Anaerobic pH measurement** at low temperatures, redesigned apparatus for, 264
- Anemia**
hemolytic, auto anti-N causing, 828
secondary, hemoglobin A₂ level in test for confirming diagnosis of iron deficiency, 549
sickle-cell, hemoglobin F and (letters), 289; 289
- Aneurysmal bone cyst**, see under Bone cyst
- Angiosarcoma**, hepatic (abstract), 601
- Antibiotic(s)**, procedural variation effects on activities of aminoglycosides *in vitro*, 438
- Antibody(ies)**
antinuclear, detection, peroxidase-antibody conjugate for, 219
anti-skeletal-muscle in soft-tissue tumors, immunofluorescence with, 332
anti-smooth-muscle in soft-tissue tumors, immunofluorescence with, 332
auto anti-N, hemolytic anemia caused by, 828
fluorescent, technic, see Fluorescent antibody technic
- Anticoagulant(s)**
lupus erythematosus (abstract), 587
thrombin-induced (letter), 584
